EDUCATION

University of Glasgow | MSc Information Technology, Sep 2022 – Sep 2024

- ✧ **Courses:** Database Theory and Analytics, Enterprise Cyber Security, Programming, Software Engineering, Systems and Networks, MSc IT+ Team Project, MSc Project for Information Technology + Advanced Programming, Algorithms and Data Structures, Cyber Security Fundamentals for MSc, Human-Computer Interaction Design and Evaluation, Internet Tech.
- ✧ **Dissertation:** Enhancing Language Learning Through Extended Reality, 3D Avatars, and Large Language Models – Designed and deployed a VR-based multilingual learning system integrating Unity, GPT-4, and Azure STT/TTS. Built full pipeline, applied prompt engineering for context retention and emotional tone, optimized for Meta Quest 2.
- ✧ **Key Academic Projects:** Blog platform for esports team (Django, SQLite, HTML/CSS, Agile); ML pipelines (scikit-learn, XGBoost, PyTorch, Flask API); Web app with Scrum methodology (Django, QA testing); Java cryptanalysis tools; SQL analytics on financial and IoT data; Algorithm complexity analysis; Assembly-level CPU control.

Dalian University of Technology | BEng Flight Vehicle Engineering, Sep 2016 – Sep 2020

- ✧ **Relative Course:** C/C++ Programming, Control Theory, Engineering Maths, Structural Design
 - ✧ **Dissertation:** Shock Wave Detection Technology for Compressible Flows – Developed C++ detection algorithms combining point/line light source models for CFD post-processing, improving accuracy for complex geometries.
 - ✧ **Key Projects:** Aircraft wing modal/dynamic simulation (CATIA, ABAQUS); UAV conceptual design; Aircraft engine monitoring in C; Model aircraft design/fabrication/testing.
 - ✧ **International:** French Engineering Schools Visiting Camp; FWD Life Insurance Intern, HK SAR.
-

RELATIVE EXPERIENCE

Graduate Research Assistant | Chinese Academy of Sciences (SIAT), Shenzhen, China, Sep 2020 – Jan 2022

- ✧ Contributed to national Belt and Road environmental monitoring project; applied image processing and Python analytics for impact assessment. Built predictive models and delivered dashboards influencing sustainability policies.

Prompt Work | Outlier.ai (Remote), Jan 2025 – present

- ✧ Designed prompts for 20+ LLM evaluation pipelines (Onyx Hammer, Rhind Evals). Developed edge-case testing strategies, ensured contextual integrity, and delivered consistently in asynchronous global team workflows.

Student Representative | University of Glasgow, School of Computer Science, Sep 2023 – Sep 2024

- ✧ Bridging faculties and students by collecting student feedback, relayed issues to staff, helped adjust coursework delivery
-

HONORS & AWARDS

- ✧ **Scottish Saltire Award (2023)** – Long-term community volunteer service.
- ✧ **Outstanding Position Paper & Honorable Mention Delegation**, NMUN New York (2019).

RELEVANT SKILLS

- ✧ **Programming Languages:** Python, Java, C++, C#, C, SQL
- ✧ **Tools & Software:** GitHub, VS Code, Unity, Autodesk Inventor, ABAQUS, MATLAB, Adobe Suite, AutoCAD.
- ✧ **Technical:** 3D Printing, Mathematical Modeling, Mechanical Simulation, Algorithm Complexity Analysis, Database.
- ✧ **Languages:** English (Professional), Mandarin (Native), French (A2), Japanese (JLPT N3).
